

Censtar Science & Technology

Censtar Science & Technology Co., Ltd. located in Hi-new technology industry development zone of Zhengzhou city, Henan province, the core area of Central Plain of China Censtar was set up in 1992. It has many honorary titles of product quality, such as "China's well-known trademark", "provincial governor's quality award", "mayor's quality award"; it has a number of national patents and software copyrights; it has independent research and development ability. It is the main drafter of national standards for explosion-proof safety technology of gas dispensers and gas stations, the designer and standard setter of IC card technology in the industry, and has a postdoctoral research station. The wholly-owned and holding subsidiaries of Zhengxing technology include: Censtar Energy Technology Service Co., Ltd., Henan zhengrongheng Energy Technology Co., Ltd., and Shanghai Zhengxing mechanical equipment Co., Ltd.

Censtar has become the leading company in this industry and the largest fuel dispenser manufacturer in China. Censtar is a national high-tech enterprise and the only company in the industry with an annual output of 100,000 Nozzles. It is the comprehensive provider of equipment and system for China 3 gas stations, refueling vehicles, refueling vessels, filling stations, charging stations, oil depots, finished oil and gas storage and transportation.

Censtar is a specialized group company dedicated to building a comprehensive service provider for energy consumption terminals in China. Censtar is a one-stop professional platform dedicated to building a full range of equipment supply, site integration, engineering construction, and technical services for customers. From 1997 to 2011, Censtar kept the No.1 position in fueling dispenser production, with around 41.8% market share in domestic market. Now, a huge sales and service network spread all over the nation to support the customers.

Censtar has successfully sold more than 1000,000 units fuel dispensers in the world with a very good running performance and service.
