

3A Composites

Conveying corporate identity internally and externally is multi-faceted: ranging from façades, canopies and totems to interior design, store fittings and signage.

Thanks to a diversified range of products that include ALUCOBOND® and DIBOND® aluminium composite sheets, FOREX® and FOAMALITE® rigid foam plastic sheets, KAPA®, FOAM-X®, SMART-X® and GATORFOAM® lightweight foamboards, DISPA® and SWEDBOARD® paper boards, LUMEX® and HIPEX® PET sheets as well as PERSPEX®, CRYLUX®, CRYLON®, AKRYLON® and PERSPEX® XT acrylic glass sheets and IMPEX® polycarbonate sheets we can offer our customers a unique and perfectly coordinated range of products – and everything is from a single source.

With more than 90.000 already developed colour formulations for acrylic sheets and around 650 developed surfaces and colours for our brands ALUCOBOND® and DIBOND®, we can perfectly support our customers in realizing individual projects with the best material choice for individual applications. Our worldwide network of more than 12.000 partner in the fields of digital and screen printing, processing, façades design and distribution make our branded products available at short notice in more than 80 countries.

We attach particular importance to sustainable manufacturing processes and environmentally friendly materials. Our corporate ecological commitment is summed up by the [MISSION: TOGETHER. RESPONSIBLE](#). As we also apply and comply with this mission in regard to our products, we have created a classification system. The five different categories in our [FIVE-DOT-MISSION](#) system indicate the factors with the greatest impact on sustainability. In line with our mission, we take pride in enlarging our portfolio with products that offer outstanding environmental properties. Within our comprehensive portfolio, there are two products which are 100% paper-based and meet the FSC® certification requirements: [SWEDBOARD® SB Fibre](#) and [DISPA®](#). Our newest additions to the product portfolio include [CRYLUX®re](#) and [PERSPEX®re](#) – acrylic sheets made from 100% recycled material. Further, we engage in projects connected to sustainability such as the creation of a [recycling system for aluminium composite panels in Germany](#) which will soon be extended to include other European countries and other products.

3A Composites GmbH is part of the international 3A Composites Group. The group belongs to the listed company Schweizer Technologies headquartered in Steinhausen, Switzerland and has approx. 4'000 employees worldwide.
